

(Graduation) Internship Composite Towers for the Offshore Wind Industry

Jules Dock Innovation

Do you want to do research in the offshore wind industry, think about design and/or work with different production methods in this innovative sector? Are you in the final phase of your HBO or WO studies? Then Jules Dock is looking for you! To strengthen our team we are looking for versatile and eager students.

About Jules Dock

Jules Dock is a dynamic and innovative organisation aimed at innovation in the maritime industry. Different business units work together on the RDM in Rotterdam to support innovation processes from start to end.

The team of Jules Dock consists of young and enthusiastic professionals. With our energetic colleagues we execute projects for leading companies in the maritime industry. Characteristic for Jules Dock is the fresh and energetic approach, curiosity to innovative challenges and the drive for a perfect result.

What will you be doing?

Jules Dock develops composite towers for the offshore wind industry. The characteristics and design freedom of composite lead to many advantages for offshore windturbine towers. In the development of the towers different aspects need further optimisation. Think about developing the production method, optimising the design and researching of material properties.

With an internship or graduation assignment you contribute to and have an actual input in the research and development of the use of composite towers in the offshore wind industry. Together with you, we will look for the best implementation of your internship or graduation assignment.

Your profile:

- You do a technical study at HBO or university, for example Maritime Engineering, Mechanical Engineering, Civil Engineering or a comparable study;
- You are creative, flexible, social and curious;
- You preferably have a basic understanding of the dutch language;
- You have an interest in innovation and engineering;
- You live in the region of Rotterdam / South-Holland.

What do we offer you?

A challenging internship position in a team of enthusiastic, young colleagues. Jules Dock is located on the RDM Rotterdam in the Innovation Dock, the centre of maritime innovation.

Additional information

The internship is a fulltime position for a period of 4 to 6 months starting in September 2018.
